Personal Injury

Farrah has over twenty years' experience in general personal injury litigation. She now has three main areas of specialism in which she is regularly instructed:

Brain and spinal injury claims

Farrah is an expert in brain and spinal injury claims with an in-depth understanding of neurological and neuropsychological medico-legal issues. Brain injuries often overlap with serious psychiatric injuries, and drawing from her extensive clinical negligence experience, Farrah is adept at forensically analysing the records and expert medical evidence and managing these cases involving large numbers of medical experts and complex medical issues. Farrah has dealt with cases involving brain and spinal injuries arising at birth, in childhood and later in life, and has experience of cases involving subtle brain injury.

Psychiatric injury claims

Farrah has extensive experience in acting for defendants in stress at work, bullying and harassment claims where claimants have suffered severe psychiatric/psychological injury. Such claims are often highly sensitive involving complex medical and legal issues. Farrah has considerable experience in managing these claims to trial or settlement. Cross examination of claimants who have suffered serious psychological/psychiatric injury is critical in many of these claims and Farrah has considerable experience of doing this sensitively but leaving no stone unturned. She is equally adept at handling the witnesses who feel that they have wrongly being accused of causing psychiatric injury.

Abuse claims

Farrah has represented both claimants and defendants in abuse claims for the last twenty years. These have often involved analysis of complex psychiatric evidence when dealing with causation. More recently, she has represented defendants in claims arising out of abuse in care homes, schools and hospitals dealing with limitation, liability and quantum in these complex cases. Farrah was appointed to the Independent Appeal Panel of the Lambeth Children's Home Redress Scheme chaired by Sir John Goldring.
